### Description

The Tiger 6000 Stereo Intercom System is a heavy duty Marine Waterproof intercom/radio system suited for daily high performance boat use. The 6000 system is modular and enables the use of a variety of components and accessories to create custom configurations and to operate to high performance and reliability standards

The T-6109-8SDB-2R Stereo Master Control Station is made of marine grade heavy duty components. It is, RF shielded, rugged, waterproof, corrosion proof and easy to install with a plug and play design to provide many years of trouble free use.

The T-6109-8SDB-2R Stereo Master Control Station features include High fidelity stereo music capability with connections for a headset/helmet cable junction box, power cable, and a variety of system and audio in and out cable devices including left and right Stereo music. The front panel includes volume, on off, squelch controls, LED, Digital Sound suppression with On/Off control and Bluetooth Cell phone feature with pairing button and Captain, Co-Captain isolation or All via a 3-way toggle switch.

The T-6109-8SDB-2R Stereo Master Control Station offers more features in a compact configuration than any other available product. The simple to use design offers a complete solution for control of on board intercom/radio communications and off board radio communications. This enables all crew members to be in contact at all times with mission personnel while performing mission critical operations.
