Description

The Tiger 6000 Stereo Intercom System is a heavy duty Marine Waterproof intercom/radio system suited for daily high performance boat use. The 6000 system is modular and enables the use of a variety of components and accessories to create custom configurations and to operate to high performance and reliability standards.

The T-6109-8SD-2R Stereo Master Control Station is made of marine grade heavy duty components. It is, RF shielded, rugged, waterproof, corrosion proof and easy to install with a plug and play design to provide many years of trouble free use.

The T-6109-8SD-2R Stereo Master Control Station features include High fidelity stereo music capability with connections for a headset/helmet cable junction box, power cable, and a variety of system and audio in and out cable devices including left and right Stereo music. The front panel includes volume, on/off, squelch controls, LED and Digital Sound suppression with On/Off control.

The T-6109-8SD-2R Stereo Master Control Station offers more features in a compact configuration than any other available product. The simple to use design offers a complete solution for control of on board intercom/radio communications and off board radio communications. This enables all crew members to be in contact at all times with mission personnel while performing mission critical operations.
