Description

The Tiger 6100 Intercom System is a heavy duty commercial Marine Waterproof intercom/radio system suited for daily work boat use. This includes military, law enforcement, homeland security and fire/rescue applications. The 6100 system is modular and enables the use of a variety of components and accessories to create custom configurations and to operate to high performance and reliability standards.

The T-61706M-BT Belt Station is a marine grade, heavy duty waterproof, RF shielded design used with a wide variety of Tiger Performance headset and helmet configurations. The belt station incorporates the use of high quality marine grade waterproof components to provide many years of trouble free use. It is also designed to be user friendly with simple to use features.

The Belt Stations enables portable and ship radio PTT communications while plugged into the intercom system and VOX/PTT portable radio communications when unplugged from the intercom system. When plugged into the intercom the crew member may choose from PTT or VOX ICS communications. The Belt Station also provides Bluetooth cell phone pairing enabling cell phone connectivity when either plugged or unplugged from the ICS. The T-61706M-BT Belt Station provides a wide range of clear communication options and flexibility in high noise or normal background noise situations.
